

TO WHOM IT MAY CONCERN

We at BoE Trust have worked with DPL for upwards of 12 years, in the deployment of the DPL Professional Chameleon Will System.

The development of our business strategy identified the need to key in to the DPL development of its .NET online Will application.

Thus it is that, working closely with DPL, in September 2011 we took delivery of our bespoke ClauseWorks Will Management System.

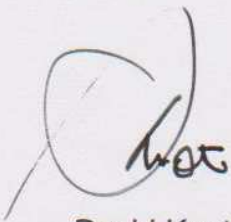

The system went live in November 2011 under the branding "WillsDirect".

Some apposite comments arising from this project are:

- DPL brought to the project immense expertise, both technical and business, which, working with the BoE and Nedbank team, has led to the outstanding success of the initiative, well beyond our expectations at this early stage;
- Deployment of WillsDirect has given us a truly world class solution which places us in a pre-eminent market position.

DPL has not only brought its leading edge technology solution, but has contributed creatively and proactively to the success of this project.

I am delighted to provide this testimonial and looking forward to working with DPL in the next phase of extension of the WillsDirect service.
